3 MOLYBDENUM-COPPER COMPOSITE MATERIAL

4

5 ABSTRACT OF THE DISCLOSURE

6 The present invention relates to a molybdenum-copper
7 composite material. The composite material is formed by forming
8 a mixture of molybdenum, phenolic, and wax, laser sintering the
9 mixture to form a green form, placing the green form and oxygen
10 free copper into a furnace, and subjecting the green form and
11 oxygen free copper to a furnace heating cycle.
